PROFILE

Results-oriented computer science student with a passion for web development and a strong foundation in programming concepts. Proficient in MERN stack technically, with hands-on experience in building responsive and user-friendly websites. Adept at collaborating with cross-functional teams and delivering high-quality solutions within strict deadlines. Possesses excellent problem-solving and analytical skills, complemented by a detail-oriented approach to ensure seamless functionality and optimal user experience. Seeking opportunities to apply my technical expertise and contribute to innovative projects in the field of web development.

WORK EXPERIENCE

MERN E-COMMERCE

2022

- Developed a full-fledged e-commerce website using the MERN (MongoDB, Express.js, React.js, Node.js) stack.
- Implemented a secure user authentication system with JWT (JSON Web Tokens) for login and registration functionalities.
- Integrated payment gateways like PayPal or Stripe to facilitate secure online transactions.
- Created a responsive and visually appealing user interface using HTML, CSS, and Bootstrap, ensuring seamless user experience across devices.
- Implemented product catalog functionality, allowing users to browse, search, and filter products based on various criteria.
- Developed a shopping cart feature to enable users to add and remove products, calculate totals, and proceed to checkout.
- Utilized MongoDB to manage and store product data, including inventory, pricing, and descriptions.
- Implemented order management functionality, allowing users to track their orders and view order history.
- Integrated third-party APIs for features like social media sharing, customer reviews, and product recommendations.

Blog website

2022

- Developed a dynamic blog website using the MERN (MongoDB, Express.js, React.js, Node.js) stack.
- Implemented user authentication and authorization functionalities, allowing users to register, login, and manage their blog posts.
- Created an intuitive user interface using React.js and styled it using CSS, providing an engaging and responsive experience for readers.
- Integrated a rich text editor, such as Draft.js or Quill, to enable users to create and format blog posts with ease.
- Implemented a robust backend using Express.js and MongoDB, storing blog posts, user information, and comments in a secure database.
- Integrated features like pagination and search functionality, allowing users to easily navigate and find desired blog posts.
- Developed a comment system to facilitate user engagement and interaction with the blog content.
- Implemented social media sharing functionality to enable readers to share blog posts on various platforms.
- Implemented SEO best practices to optimize the website for search engine visibility and increase organic traffic.
